Aim & Scope

„Ecologia Balkanica“ is an international scientific journal, in which original research articles in various fields of Ecology are published, including ecology and conservation of microorganisms, plants, aquatic and terrestrial animals, physiological ecology, behavioural ecology, population ecology, population genetics, community ecology, plant-animal interactions, ecosystem ecology, parasitology, animal evolution, ecological monitoring and bioindication, landscape and urban ecology, conservation ecology, as well as new methodical contributions in ecology. Studies conducted on the Balkans are a priority, but studies conducted in Europe or anywhere else in the World is accepted as well.

Published by the Union of Scientists in Bulgaria – Plovdiv and the University of Plovdiv Publishing house – once a year. Language: English.

Peer review process

All articles included in “Ecologia Balkanica” are peer reviewed. Submitted manuscripts are sent to two or three independent peer reviewers, unless they are either out of scope or below threshold for the journal. These manuscripts will generally be reviewed by experts with the aim of reaching a first decision as soon as possible. The journal uses the double anonymity standard for the peer-review process. Reviewers do not have to sign their reports and they do not know who the author(s) of the submitted manuscript are.

We ask all authors to provide the contact details (including e-mail addresses) of at least four potential reviewers of their manuscript. These should be experts in their field of study, who will be able to provide an objective assessment of the manuscript. Any suggested peer reviewers should not have published with any of the authors of the manuscript within the past five years and should not be members of the same research institution. Members of the Editorial Board of the journal can be nominated. Suggested reviewers will be considered alongside potential reviewers identified by their publication record or recommended by Editorial Board members.

Once an article is accepted, it is published in Ecologia Balkanica immediately online first as a PDF file. The paper will subsequently be published in both full text formatted PDF online (open access) and in the print copy of the journal.

CABI is a not-for-profit international organization that improves people's lives by providing information and applying scientific expertise to solve problems in agriculture and the environment. Our mission and direction is influenced by our member countries who help guide the activities we undertake. These include scientific publishing, development projects and research, and microbial services. 2010 marks 100 years of CABI. Since its beginnings as an entomological committee in 1910, it then developed into a Commonwealth organization before becoming a truly international service in agricultural information, pest identification and biological control in the mid 1980s.

Dear authors and researchers,

Your views on open access publishing are needed!

The SOAP Project* is currently conducting an online survey to assess researchers' experiences with open access publishing. This survey aims to inform the most comprehensive analysis of attitudes to open access publishing to date and is seeking views from a wide a range of interested parties. It is primarily aimed at active researchers in public and private organizations, from all fields of the research in the sciences and humanities and focuses on publication of research articles in (open access) peer-reviewed journals.

If you would like to contribute to shaping the public discourse on open access, please visit http://surveymonkey.com/soap_survey_g

It should take 10-15 minutes to complete. Please share this news with your research collaborators, so that the views from your community will be properly represented.

The survey outcome will be made public and openly shared with the publishers, research funding agencies and European Commission, libraries and researchers.

Thanks in advance!

The SOAP Project Team

(* Note: The SOAP consortium is funded by the European Commission and coordinated by CERN, the European Organization for Nuclear Research. It represents key stakeholders in open access, such as publishers BioMed Central, SAGE and Springer; funding agencies (the UK Science and Technology Facilities Council) and libraries (the Max Planck Digital Library of the Max Planck Society). The project runs for two years, from March 2009 to February 2011.
